Wilmington, NC -- (ReleaseWire) -- 01/16/2017 -- Harbor Roofing & Siding, a roof and siding company based in Wilmington NC, has partnered with a local marketing company; Soaring Away, to expand the company's presence in the region.

"If you have a building, sooner or later you are going to need someone to repair or replace the roof," said Nate Thompson, owner of Harbor Roofing & Siding. "We've been in business for more than a decade in Wilmington. Now, it's time to reach out and grow. We need to get the word out about our roofing and siding work to a much larger audience."

Harbor Roofing offers asphalt and <http://www.youtube.com/watch?v=o9-MONHFUT8>>metal roofing solutions for residential, commercial and industrial buildings. The company also offers free estimates for roofing work. Mr. Thompson does the estimates himself.

"You deal with the man in charge, me. That way you know you are getting a reliable estimate, you talk with me. We decide what needs to be done and what you can afford, based on the kind of roof you want or the repairs you need," he said. "That's what sets Harbor Roofing apart from the rest of the companies in the region. You are important and that's why I want to talk with you in person about your roof needs."

The company is currently working with property owners who have wind-damaged roofs. Mr. Thompson said he works with the property owner to make sure the insurance company gives the owner a fair deal on repair and replacement.

"We work for you, not the insurance company," he said. "We're going to make sure that you get a fair settlement and you get a roof that won't leak. A lot of people are moving to metal roofs because of the longevity, but we are recommending a new asphalt shingle that can survive 100 mile-an-hour winds. Hurricane Matthew won't be the last time we get pounded by severe weather."

The company also offers siding work, repair and installation of new siding.

"When people think about siding, they think vinyl. We have that and more. We have insulated siding; this has insulation attached to the siding for a lasting fit. We also have fiber cement siding. This mix of sand and cement can be painted and it's a lot tougher than traditional vinyl siding," he said. "If you need a new look to the outside of your building, we're ready to work for you. As always, I come out to give you the estimate."

Holly Powell, owner of Soaring Away, said she's very happy to have Harbor Roofing & Siding come on board. She said the company's reputation for excellence and reasonable costs deserve as much attention as possible.

"Nate prides himself on getting the job done right and on time. His reputation in the Wilmington area is first-rate," she said. "We look forward to telling more people about his company. We especially look forward to telling people across the region about Harbor Roofing."
